4th AL-KHWARIZMI
INTERNATIONAL MATHEMATICS AND INFORMATICS OLYMPIAD

KhIMIO Task Submission & Confidentiality Policy

1. INTRODUCTION

The Scientific Committee (SC) of the Al-Khwarizmi International Olympiad (KhIMIO) ensures adherence to academic integrity and high-quality standards throughout all processes.
This document regulates the obligations of authors submitting problems in the fields of Mathematics and Informatics, as well as the legal framework for the use of the submitted materials.

2. ORIGINALITY AND INTELLECTUAL INTEGRITY

All submitted problems must be unique (original) and must not have been used in any other local or international competitions, published in print (books, collections), or posted on electronic platforms (e.g., Codeforces, AoPS, etc.).
Submissions found to be substantially similar to or minor modifications of well-known or existing problems will not be considered by the Scientific Committee.
Authors are strictly prohibited from submitting a task to other olympiads or competitions until the Scientific Committee issues an official decision (notification of acceptance or rejection) regarding the task.

3. CONFIDENTIALITY AND INFORMATION SECURITY

From the moment of submission until the conclusion of the KhIMIO 2026 competition, the author must keep the content of the task confidential and must not discuss or share it in any form with third parties, including potential participants or coaches.
The Scientific Committee will send the author an official notification regarding the selection or rejection of the submitted task.
If a task is included in the "Shortlist" but is not used in the current year's competition, the Scientific Committee may propose that the author keep the task confidential for the following year's olympiad.
Should the author reject this proposal, the right to use the task freely shall be returned to them.
The Scientific Committee provides a full guarantee that tasks submitted but not found suitable for use will not be utilized for other purposes and that their confidentiality will be maintained.
If an author discovers that their task has been published by third parties or solved publicly after submission, they must officially notify the Scientific Committee within 48 hours of such discovery.

4. INTELLECTUAL PROPERTY AND USAGE RIGHTS

By submitting a task, the author grants the KhIMIO Organizing Committee a non-exclusive, perpetual, and royalty-free license to use, translate, and distribute the material.
In the event that it becomes necessary to adapt selected tasks to competition requirements (simplification, editing, or contextualization/nationalization), the Scientific Committee reserves the right to carry out these changes while notifying the author.
Authors of tasks that are selected and used in the competition will be specifically credited in official KhIMIO materials (website, shortlist, solution booklets, etc.).
If an author wishes to remain anonymous, they must notify the Scientific Committee in writing in advance.
Following the conclusion of the competition, all used tasks will be released for public use under the terms of the Creative Commons Attribution 4.0 (CC-BY 4.0) international license.
Under this license, while copyright is retained, third parties are granted the right to use and distribute the tasks.

KhIMIO Task Submission & Confidentiality Policy

5. TECHNICAL REQUIREMENTS AND QUALITY CONTROL

For Mathematics: Submitted problems must include a complete, step-by-step proof. Submissions that only provide an answer or contain incomplete solution sketches/proofs will not be considered.

For Informatics: The problem package must include a reference solution in C++, a description of the algorithm used, and suggested time and memory limits.

The Scientific Committee reserves the right to simplify the problem statement, re-edit, or change technical constraints to ensure competition balance and fairness. These changes shall be implemented in consultation with the author.

6. CONFLICT OF INTEREST

If an author is currently involved in the preparation process (as a coach, consultant, or tutor) of any team or individual participant expected to compete in KhIMIO, they must officially disclose this to the Scientific Committee at the time of submission

If an author's immediate family members (children, siblings) are participating as contestants in the specific track (Mathematics or Informatics) for which the task is being submitted, the submission of tasks for that track is not permitted.

7. LIABILITY AND DISQUALIFICATION MEASURES

Violation of the requirements of this document, particularly breaches of confidentiality or instances of plagiarism, will result in the following measures:

The submitted task will be immediately removed from the problem pool and the olympiad process.

The author will be permanently barred from all future KhIMIO events and task submission processes.

An official notification regarding the breach of ethics and confidentiality protocols will be sent to the author's affiliated organization, employer, or the relevant national olympiad committee in their country.
